As a farm owner, operator or manager, **you are responsible for the safety and health of everyone** who lives, works or visits your farm or ranch. Everyone.

**THAT MEANS YOU NEED TO GET WITH THE PLAN!**

**The Canada FarmSafe Plan.** Developed by the Canadian Agricultural Safety Association for you. No matter what sort of farm you run. Anywhere.

**The Canada FarmSafe Plan** is a business risk management tool. The Plan's best practices recommendations provide you with guidance on developing an effective health and safety program for your farming operation.

It takes commitment. It delivers security. It could save lives.

**The Canada FarmSafe Plan** goes way beyond hazard assessment check lists. It's a living document with tools to make safety part of every plan and action on the farm.

**You'll find clear instructions for:**

- composing a general policy statement for safety and health for your farm
- identifying hazards
- controlling hazards, including documenting standard operating procedures for all work on the farm, outlining emergency actions, conducting training and investigating incidents
- communicating responsibilities
- reviewing the plan

You can print, sign and post Plan documents to underscore the safety commitment of all who manage and work the farm.

**Download the core Canada FarmSafe Plan at no charge.**  
**[www.planfarmsafety.ca](http://www.planfarmsafety.ca)**

.....

CASA members can access the complete Canada FarmSafe Plan for their private use at no cost. The complete Plan contains the core Plan plus supporting documents such as templates, sample scenarios and planning tools. Call **1-877-452-2272** or email **[info@casa-acsa.ca](mailto:info@casa-acsa.ca)** for more information about the complete Canada FarmSafe Plan.
